That's a big number. According to the U.S. Department of Health and Human Services 70 percent of people age 65 or more will sometime in their life need care for 90 days or longer. That means whether you are young or old, the odds are high that there will be a time sooner or later when you will need long-term care. With the Baby Boomers coming into retirement age, the need for long-term care facilities is rising, pushing up the cost of such care. Are you prepared for this?
